EDUCATION

Duy Tan University

9/2022 - Present

Bachelor of Software Engineering

GPA : 3.5

- Complete the core courses, algorithms, and computational subjects proficiently
- Good foundational knowledge and apply it effectively to major projects or academic assignments

PROJECTS

● Project: Green Mind – Behavior Analysis Platform 9/2025 - Present (Group Project – 5 members)

Description: Developed a behavior analysis survey system that models user behavior based on personality traits (OCEAN), generates survey questions dynamically, and evaluates engagement scores across demographic sub-contexts to optimize behavioral strategies. **(Mobile App and Dashboard)**

Role: Website developer

Key Technical: TS, Nextjs, ExpressJs (Nodejs), PostgreSQL.

- Designed and implemented RESTful APIs
- Designed database schema and handled data persistence
- Integrated backend APIs with Next.js frontend
- Collaborated with team using Git and pull requests

Repository:

- https://github.com/VoDangCMU/Green_MindMap_Backend
- https://github.com/VoDangCMU/Green_MindMap_Frontend

● Project: Pizza - Vo Dang (Group Project – 5 members) 4/2025 - 6/2025

Description: Pizza Vo Dang is a full-stack pizza ordering website built with **Next.js (TypeScript)**, **Express.js**, and **PostgreSQL**, supporting online ordering and order management.

Role: Website developer

Key Technical: TS, Nextjs, ExpressJs (Nodejs), Postgre

- Designed and implemented RESTful APIs
- Designed database schema and handled data persistence
